

Day 1: Monday, March 23, 2.00-6.00pm

Registration & welcome: 2.00-2.30 pm

Session 1: Models and therapeutic innovations

- **Keynote Lecture: 2.30-3.30pm Anna Golebiewska**

- **Presentations: 3.30-4.30pm**

1. Frank Bielle, Paris

"Integration of histology and spatial transcriptomic reveals prognostic molecular pathways within the tissular architecture of glioblastoma"

2. Aurélie Tchoghandjian, Marseille

"Targeting the fatal synergy: glioblastoma stemness and immunosuppression as therapeutic vulnerabilities"

- **Short Talks: 4.30-5pm**

1. Anthony Lemarie, Toulouse

"Tumoral metabolic heterogeneity drives mitochondrial bioenergetic plasticity in glioblastoma stem cells and radiation-induced stemness"

2. Ludovic Doucet, Nantes

tba

3. Soumi Mukherjee, Paris

"Evaluation of ultrasound-induced tumor microenvironment modulation alone and in combination with immune checkpoint inhibitors in glioblastoma"

- **Poster Session: 5-6pm**

Day 2: Tuesday, March 24, 9.30am-6pm

Opening 9 am

Session 2: Tumor communication and secretion

- **Keynote lecture: 9.30-10.30am Benjamin Werner**

Coffee break 30 min

- **2 presentations: 11.00-12.00am**

1. Quentin Roux, Nantes

"Extracellular matrix-driven changes in glioblastoma stem-like cells and their secreted extracellular vesicles"

2. Tony Avril, Rennes.

"IRE1 regulates protein secretion to control immune landscape in glioblastoma"

- **Short Talks: 12.00-12.30am**

1. **Alexa Saliou, Nice**

"Uncovering the role of CELF2 pathway to target glioblastoma stem cell plasticity"

2. **Laura Merlet, Nantes**

"Exploring the functions of centriolar satellites in glioblastoma"

3. **Caroline Seiffert, Rouen**

"Role of the autophagy protein ATG9A in endosomal trafficking supporting the invasive properties of glioblastoma cells"

- **Poster Session & Lunch: 12.30am-2.30pm**

Session 3: Tumor resistance and vulnerabilities

- **2 selected presentations: 2.30-4.00pm**

1. **Delphine Poncet, Lyon**

"what IDH1/2 mutations tell us about oligodendroglioma history "

2. **Claire Pecqueur, Nantes**

"Metabolic pressure drives molecular heterogeneity in Glioblastoma"

3. **Giorgio Seano, Orsay**

"Cell plasticity dynamics and microenvironment remodeling following chemoradiation and neurosurgery"

Coffee break 30 min

- **Short Talks: 4.30-5.00pm**

1. **Julie Lafont, Marseille**

"Targeting metabolic vulnerabilities in diffuse midline gliomas"

2. **Nora Essakhi, Marseille**

tba

3. **Yann Zerguine, Rouen**

"Organoid-based modeling of Li-Fraumeni syndrome reveals variant-specific p53-driven neurodevelopmental and oncogenic trajectories"

- **Networking session: 4.30-5.00pm**

- **Patient association roundtable: 5.00-6.00pm**

Day 3 : Wednesday, March 25, 2026 9.30am-12.00am

Opening 9 am

Session 4: Clinical and translational perspectives

- **Keynote lecture: 9.30-10.30am David Castel**

Coffee break 30 min

- **3 short talks: 11.00-11.30am**

- 1. Dave Ng, Orsay**

tba

- 2. Yvette Hayat, Paris**

“Oncometabolite D-2HG Alters m6A RNA modifications in IDH mutant gliomas to promote neurogliomal synaptic signaling”

- 3. Ines Garrouche, Poitiers**

“New insights of YAP activity in brain metastases from colorectal cancer”

Concluding remarks
